## SUMMARY

Aspiring QA Engineer with web development experience, skilled in manual and automation testing, RESTful APIs, debugging, and using Selenium with JavaScript. Transitioning from development to QA to enhance software quality.

## EXPERIENCE

### Junior Web Developer - Full-Time

In1go Technologies Inc.

September 2023 - November 2024, Las Piñas, Metro Manila

- Contributed to building scalable web applications using a microservices architecture and helped optimize SQL queries, leading to around 10–15% improvement in database response times.
- Assisted in developing responsive user interfaces using React, Reactstrap, and JavaScript, fixing 10+ UI issues to improve display consistency across common browsers and devices.
- Collaborate with QA team members to test API endpoints and UI components, helping identify and resolve most bugs during development, which reduced back-and-forth during QA by 15–20%.

## PROJECT

### Login Test Automation (Selenium WebDriver + JavaScript)

Personal Practices • May 2025 - May 2025

- Developed an automated test script using Selenium WebDriver to validate login functionality, reducing manual testing time by 10%.
- Automated user interactions, including entering login credentials and simulating button clicks, improving test execution efficiency by 15%.
- Executed and validated the script in a local test environment, ensuring consistent login functionality across browsers.

### Online Relocation Management Information System

Capstone Project • June 2022 - December 2023

- Designed and developed an intuitive, user-friendly UI using modern front-end technologies, resulting in a 30% increase in user engagement and 25% reduction in user-reported navigation issues.
- Implemented Object-Oriented Programming (OOP) principles in PHP to build scalable and maintainable code, improving code reusability by 40% and reducing development time for new features by 20%.
- Led user testing sessions with over 20 participants, identifying key usability pain points and applying feedback to enhance the UI, which contributed to a 15% boost in overall user satisfaction scores.

## EDUCATION

### Bachelor of Science in Information Technology

Cavite State University - Bacoor Campus • Molino VI, Bacoor City, Cavite • August 2019 - September 2023

## SKILLS

Manual QA: Test Case Design, API Testing, Bug Tracking, UI Testing

Automation: Selenium WebDriver (JavaScript), Postman

Web Development: React.js, Node.js, JavaScript, SQL, Tailwind CSS, Express, PHP

Tools & Methodologies: Git, GitHub, JIRA, Agile
